

John Downey & Rhoda Taylor.  
Resurvey of part of sec. 2 T. 10 N. R. 1 E.

425

Nov 23rd 1886. Ran the following lines and established the following described corners in section 2. T. 10 N. R. 1 E. for John Downey and Rhoda Taylor to wit as follows: Commencing at center of section running thence North 106 poles on random line (variation  $3\frac{1}{2}^\circ$ ) to established corner "O".

Corrected OL and at request of interested parties established "R" the NW corner of SW quarter of N-E quarter of section 2 T. 10 N. R. 1 E. on true line 88 poles North of beginning. Then began at "O" ran thence West (variation  $5^\circ$ ) twenty-seven (27) poles to establish

ed corner "P"; thence South 21 W 43 poles to "S". Having calculated the bearing from the description of plotted tract of land as given in Mrs Taylor's deed and found it to be S.  $3^\circ 15' W$  and used the bearing S.  $21^\circ W$  by as through calculation, I corrected by going S. at S. the distance corresponding to difference in two bearings. Then thence S  $83^\circ 18'$

65 poles 17 $\frac{1}{2}$  l. to SQ. Course and bearing both being unknown and having been calculated from afore said descriptions. Found bearing to be correct but course short 20 l. Mr. Special Balce acting for Mrs Taylor and John Downey junior, acting for John Downey Sen. both requested that I should correct discrepancy and prove the correctness of my calculation by running QP and TS saying that if TS proved the length I declared it would be 9 poles 5 $\frac{1}{2}$  l. they would ask for no further proof. I told them I considered the corners established when I should correct the lines. Q.S. and S.P. but if they would agree to OP and Q.L. as true measures and pay for the unnecessary lines desired at regular rates I would run them. They agreed to both propositions very cautiously. I found QP, ran North from Q 63 poles 15 l. to "T" thence West said 9 poles 5 $\frac{1}{2}$  l. and verified the previous location of corners as correct.

I established corner at S. Witness trees. Buck 20 in. S. 8 $\frac{1}{2}$  E. 2.66 ch. Wild Plum 8 in. N. 41 E. 2.56 ch. Witness trees were standing at each of the following corners "L", O, P, Q. I replanted rocks at all of them except O which was still standing.

It will appear from official notice of above described survey that a survey of entire section was thought necessary. But learning that the location of "S" only was desired, I knew the two lines last described were all that were necessary and told the parties so. They insisted on the entire survey as given since the large amount of unnecessary work.
